

## **FUTURE EARTH PIE**

### **POLITICAL AND ECONOMIC HUMANIZATION**

#### **INDUSTRIAL REVOLUTION OF THE 21 ST CENTURY**

**GLENN MAJOR 0411 514 500 (FOCALPOINT 2000) (gmmajor@optusnet.com.au)**

**(a) Peace Strategies (b) United Nations Revised Structure (c) 3year amnesty on war**

**(d) Prototype Safe Zones (e) Political Reform**

This is an extract from the full document destined for display of whole project, a book format, possible charity, and interactive dedicated website to grow the cause internationally.

**Declaration of support or assistance is invited.**

#### **(a) UNITED NATIONS PEACE STRATEGIES**

**The UN must drive new protocols and new structural form, as one world.**

***This is a plea to all earthlings, from the most modest, to the most powerful and outlines a creed which defines criteria, strategies and balances, of the perfect model of a peaceful equitable sustainable but prosperous world. For this to work in reality we must see our personal and cultural brand as a product of our parents and our forefathers and embedded by history with traditional divisions.***

***We must draw a line in history, open up our hearts and change our shape for future sophistication & peace. Let's all look each other in the eye, stand together without blame, between terrorists, president's refugees or suffering children and take action towards a peaceful world and turn our addiction to self-interest to an addiction for action to regenerate and liberate the people of the earth.***

***It's time for the industrial revolution of the 21st Century.***

***It must be a peoples' revolution with political and corporate responsibility.***

***It's time for action towards a peaceful, equitable Earth with safe suburbs.***

***It's time for political and economic humanization.***

The rule of law, human rights, sociological change, and acceptance of the truth defined by historical record combined with academic analysis to define an optimum set of protocols and a physical plan for structural reform defined through an integrated network at all factors of scale between all nations, is the only way to secure a peaceful equitable world.

All nations must negotiate and vote on the protocols relative to their model.

We must exhibit good will and empathy towards other races religions or political systems.

An optimum model may borrow from other political philosophies for example social policies must exercise a duty of care and adequately service the population and manage health and wellbeing with opportunity to advance individual aspirations and prosper.

Democratic process involving delegations of leaders may not uncover the scope of all necessary reforms and be compromised by entrenched political positions or coalitions and associated propaganda or define practical implementation of UN values and objectives, similar to political parties whose party platform limits the scope of any systemic reform because critical global effects are not on the radar. Wars where the young men including soldiers are sacrificed and innocent civilian populations in their suburbs and cities are seen as an enemy to be killed are obsolete. Modern warfare of remote drone or rocket attack is cowardly and to reduce your own casualties and highly destructive with imperfect intelligence and too many innocent victims.

#### ***STAND RESPONSIBLE FOR YOUR RECORDS OF WAR OR PEACE AND BE OPEN TO CHANGE.***

***Historical record shows the political style and behaviour of nations, and all nations must be held accountable for their historical record, and regenerate and compensate violated nations, where there is justification. In the past the human fixation was to be strong but blind to moral principles, to uphold the honour of proud men and the greatness of the nation or creed, & force millions to die in wars to prove a point because someone's feelings are hurt by a nation's leader or political incident or event. It is cowardly and dumb to stand behind your war machine instead of talking it out man to man or woman, with diplomacy with a better outcome for the economy and the earth, because the damage from war can't be fixed or refugees housed adequately or communities ever recover and divisions widen. No leader has the right to sacrifice the population to the mass carnage of war.***

## **PEACE NOT WAR: LIVE WITH EQUITY IN SUSTAINABLE SAFE SUBURBS**

**These are the core underlying truths for United Nations protocols.**

**Demilitarise and live in peace with no more war. Stop funding the war industry it perpetuates the wars and the arms race. Spend war money on nation building after war, housing refugees and elevating disadvantaged people in all our cities.**

**Fund the peace industry and sustainable environmental agendas with the war money and humanize all political systems, support needs of the people,**

**The left move right the right move left, cull the corruption of the ruling class, cull the excesses of capitalism and globalization to increase living standards, quality of life and job security of the people. Regenerate the earth and suffering people.**

**Empower all nations that there shall be NO MORE WAR. Find the formula for peace.**

**All Nations look after each other as citizens of earth, as one human race as one world.**

### **DIFFUSE THE ABSOLUTE POWER OF LEADERS AND POLITICAL POWER**

The absolute control of political leaders and the dominance of corporate identities in political outcomes must be regulated. Governments are blind to effects of globalization for decades and suddenly attempt a quick fix when we are already into a discount life in a discount world, but leave massive populations in impoverished conditions while boasting about a thriving economy and spending billions on unneeded weapons. Value for money is to keep your own industries jobs and culture and not adopt generic values for everything without anything to believe in and without striving for high standards in everything like generations decades ago did. Service to the public in our best interests is gone. Franchises and brand name companies and contract and part time employment, exploit our workers and destroy our industries in the desire for a quick buck with minimum production costs, placing financial risk on others or unsuitable products with limited ranges of choice driven by fashion and brand names to make more profit.

### **OUR PLANET UNITE**

We all expect a good lifestyle, and a good job, to fulfill our dreams with a career with fair pay & secure work, without disadvantage; to have a family in the suburbs and bring up the kids in the spirit of love and pride in the Nation and around the world in all Nations. We must define a pathway to a transparent proud united future earth with human values as a core ingredient, by restructuring the United Nations and extending a code of consistent values and protocols, internationally into and between each nation. We must all be proud of our nation and proud of our planet. We must all believe in ourselves our cultures and a future equitable and peaceful earth. It must be not only about me, it must be not be only about our country, it must be about all of us in the whole human race as brothers and sisters from mother Earth and father Sun.

### **VALUE OF A HUMAN LIFE**

Amend International Law to declare the value of a human life in one's own nation, and of a foreign national, are equal and, if murder is the charge for killing a person at home, to kill residents of a foreign land or by warfare and in tens, hundreds, and thousands, is a crime against international law and defined as genocide. The damage caused, the impacts on communities and displaced families, including refugees, is the responsibility of the force that created the damage, and they must empathize and support regeneration of damage, and provide habitable safe environments for victims and repair their suburbs to the benefit of the nation affected. This shall be retrospective with reference to previous interventions, where reasonable action should be taken in support of the subject nations and communities affected. Implied blame and responsibility rests with the offending nation who is causing harm to its population or causing divisions or war.

### **WAR IS DECLARED ILLEGAL: LET THERE BE NO ENEMIES.**

**you can't kill a foreign earth citizen or damage their homes and suburbs.**

### **DRAW A LINE IN HISTORY NOW TOWARDS A PEACEFUL EQUITABLE WORLD**

**Let our generation of the 21<sup>st</sup> century be remembered for the architects of change to peaceful non-confrontational diplomacy and friendly equitable and peaceful world.**

**Let there be peace on earth, for future generations. The lives of the young shall no longer be sacrificed in battle, without living their lives and having families for the whim of our leaders who deem to act in ownership of the nation without consideration of the best interests of their populations and go to war.**

## **ALIGN UNIVERSE EARTH**

***Align every life force in universe earth for the greater good.***

*Align our universe earth the centre of our universe, align with our life force for each precious lifetime of each human being, in each cultural and geographic zone. We must define who we are.*

*We must share our great attributes together as one. We must do the best we can in the 21<sup>st</sup> century.*

*We are different from all other centuries in the greatest technological revolution in history.*

*It's time to make history and change history not in isolation but together as one.*

## **MODIFY NATIONAL MODELS**

An example of modification of the national model is China's rise by combining the advantages of capitalism alongside the socialist politics of communism. It has become the most advanced manufacturing and development nation on earth with sophisticated and efficient manufacturing, coordination and design systems dominating global trade, and producing impressive development works, massive infrastructure projects of freeways and bridges and efficient building systems. Like their Olympic village are examples, however in trade products must comply with reasonable standards and reasonable pay and conditions to workers. Totalitarian practises of secrecy and corruption by the ruling class, suppression and exploitation of the workers and community groups must be reformed to a level of compliance with human rights and diplomatic standards.

## **BIND TOGETHER WITH COMMON AGENDAS**

*WE must bind together as one for our common interests and common advantage beyond politics to endorse common agendas and take pressure of every nation who may exist with uncertainty or unnecessary fears of world affairs or world dynamics. We all need to know where we stand so we don't waste money pursuing unnecessary agendas which may be a handicap or impact on other nations. Consider the United Nations Charter as the bible for a religion that overrides all others for us all to look after the earth and look after each other and hopefully see the need to reform our own backyards in our own best interests no matter how large or how small your nation may be. We must all be guided by historical record and the realities of present times where some processes and some power bases are having an unbalanced effect favouring some and disadvantaging others. There seems to be no way of controlling globalization or the main powerbrokers but regulation that favours all players is desired in the human interest. In some situations, restraint or a balanced view may be good diplomacy to regenerate industries or resolve social or political problems to political advantage and maybe better than Strong Man tactics. If the internal politics of another nation reflect suppression corruption and sectarian violence, and it has been a chronic historical condition in that nation, for generations on grounds of tribal or religious differences, then remedial action will be a long process and the responsibility of that culture to sort out. Intervention would only inflate and justify their cause and deepen political divisions. Negotiations must be exhaustively applied and compromises reached to prevent loss of life and damage to the earth and acceleration of the polarization of the communities and their political differences. Politicians, Tv Personalities & the media project their own version of reality on television which may not represent the reality at ground zero or reflect the opinion or best interests of the people as they have little incentive for change as their own political interests are all encompassing. Fear of perceived enemies, and incitement of fear of each-others military force by graphic displays of wars and terrorist acts on the TV, prolongs the arms race and military spending, when substantially the majority of nations are at peace and in the globalized world all rely on each other for trade, tourism, education and other enterprises, even between nations of different political views, many who could be painted as enemies. There are no enemies in the modern era. We all support each- others economies with globalization and trade. Tourism is a massive industry binding all nations with a fixation of what a magical diverse world we live in with diverse histories and cultures and man-made wonders. We can no longer kill enemy civilian populations like lambs to the slaughter in war or sectarian violence and terrorism. The majority, of the earth's population is living in wonderful sophisticated, highly technological, societies, except for regions where different political systems or obsessive religious faith based on medieval philosophy results on dominance of the regime or Rogue states and Dictatorships who impose suppression, discrimination against women or terrorism, division, and war. I make a plea offenders'. Don't judge others be happy and fulfilled in life instead enthusiastically embrace and vote for the 3 Year amnesty on war.*

## **(b) UNITED NATIONS NEW STRUCTURE**

### **UN NEEDS A PHYSICAL OPERATIONAL HEADQUARTERS**

**There must be equitable management of global affairs, with a structure and plan for action to instate compliance with human rights values and critical humanitarian work and on the basis of need, and extend membership to all nations to effectively fund activities of the UN and collectively curb inequalities. and nation building agendas including integrate refugees in limbo or in camps into safe zones.**

### **CRITICAL REFORM OF UN STRUCTURE REQUIRED**

**A vote on a new United Nations model in the General Assembly of all member nations is desired to endorse this new structure to protect the earth, its people and the future.**

#### **PROPOSED CRITICAL ELEMENTS**

**1 UN World Management and Peace Council**

**2 Code of World Management and Peace**

**3 United Nations Operational Headquarters in neutral location**

**4 Regional UN Operational Branches**

**5 National Operational Branches**

**6 Shut down Security Council for independent non-confrontational diplomacy.**

**For critical emergencies a UN sanctioned multinational security force will act.**

**7 New Human Priority Assembly** organize and fund urgent humanitarian needs

**8 New Financial and Economic Reform Council** to fix global excesses and inequalities.

### **UNITED NATIONS HUMAN PRIORITY ASSEMBLY**

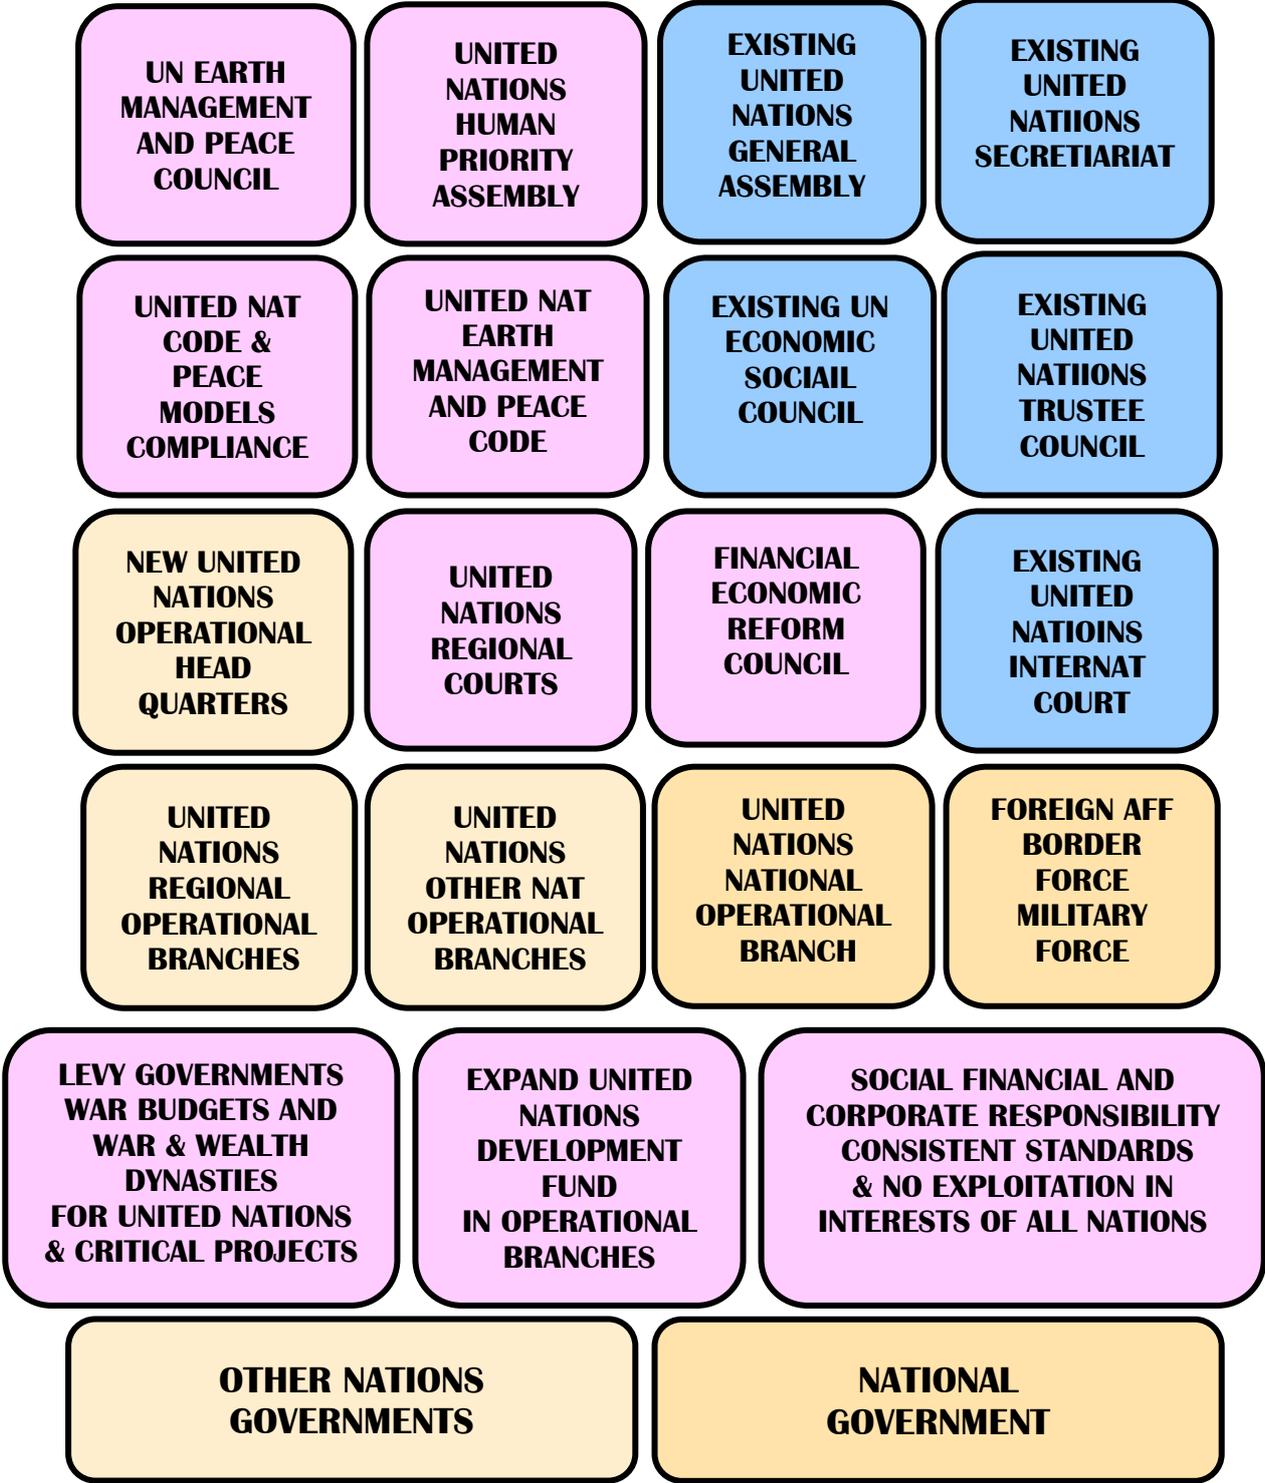

This shall be a second official assembly as Citizens of the Earth without boundaries related to urgent human agendas and hosted by UN Operational Headquarters and attended by National Operational Branches who submit their requests for assistance or mediation in resolution of their humanitarian crises or nominated by UN Headquarters for action. Peace and harmony will be the overriding objective for current and future generations. The agendas of the Millennium and Sustainability Goals will also be put into action to raise the quality of life of human beings wherever their location. All member or non-member states are eligible to make an application. All heads of state shall be present at a ceremonial forum with same no of meetings as general assembly and possibly back to back, and second on the agenda, to review outcomes and approve any further action necessary to complete current projects successfully. Structural and organizational matters related to demilitarization will also be on the agenda including relaxation of political tensions by agreement and negotiation by analysis of the reality of situations causing harm to populations and destructive impact on the earth. Systematic removal of military bases in foreign locations to take place as political tensions are relieved by agreements between nations. Regional assemblies are to take place prior to submission to the main assembly for coordination and agreement within the region and definition of agendas and proposals or consistent regional approach if it is considered necessary in everyone's interests.

### **U N PEOPLES VOICE SYSTEM**

A peoples' voice system, has a Peoples Interest Advocate who advises the executive level of United Nations able to speak in the general assembly prior to votes on critical business.

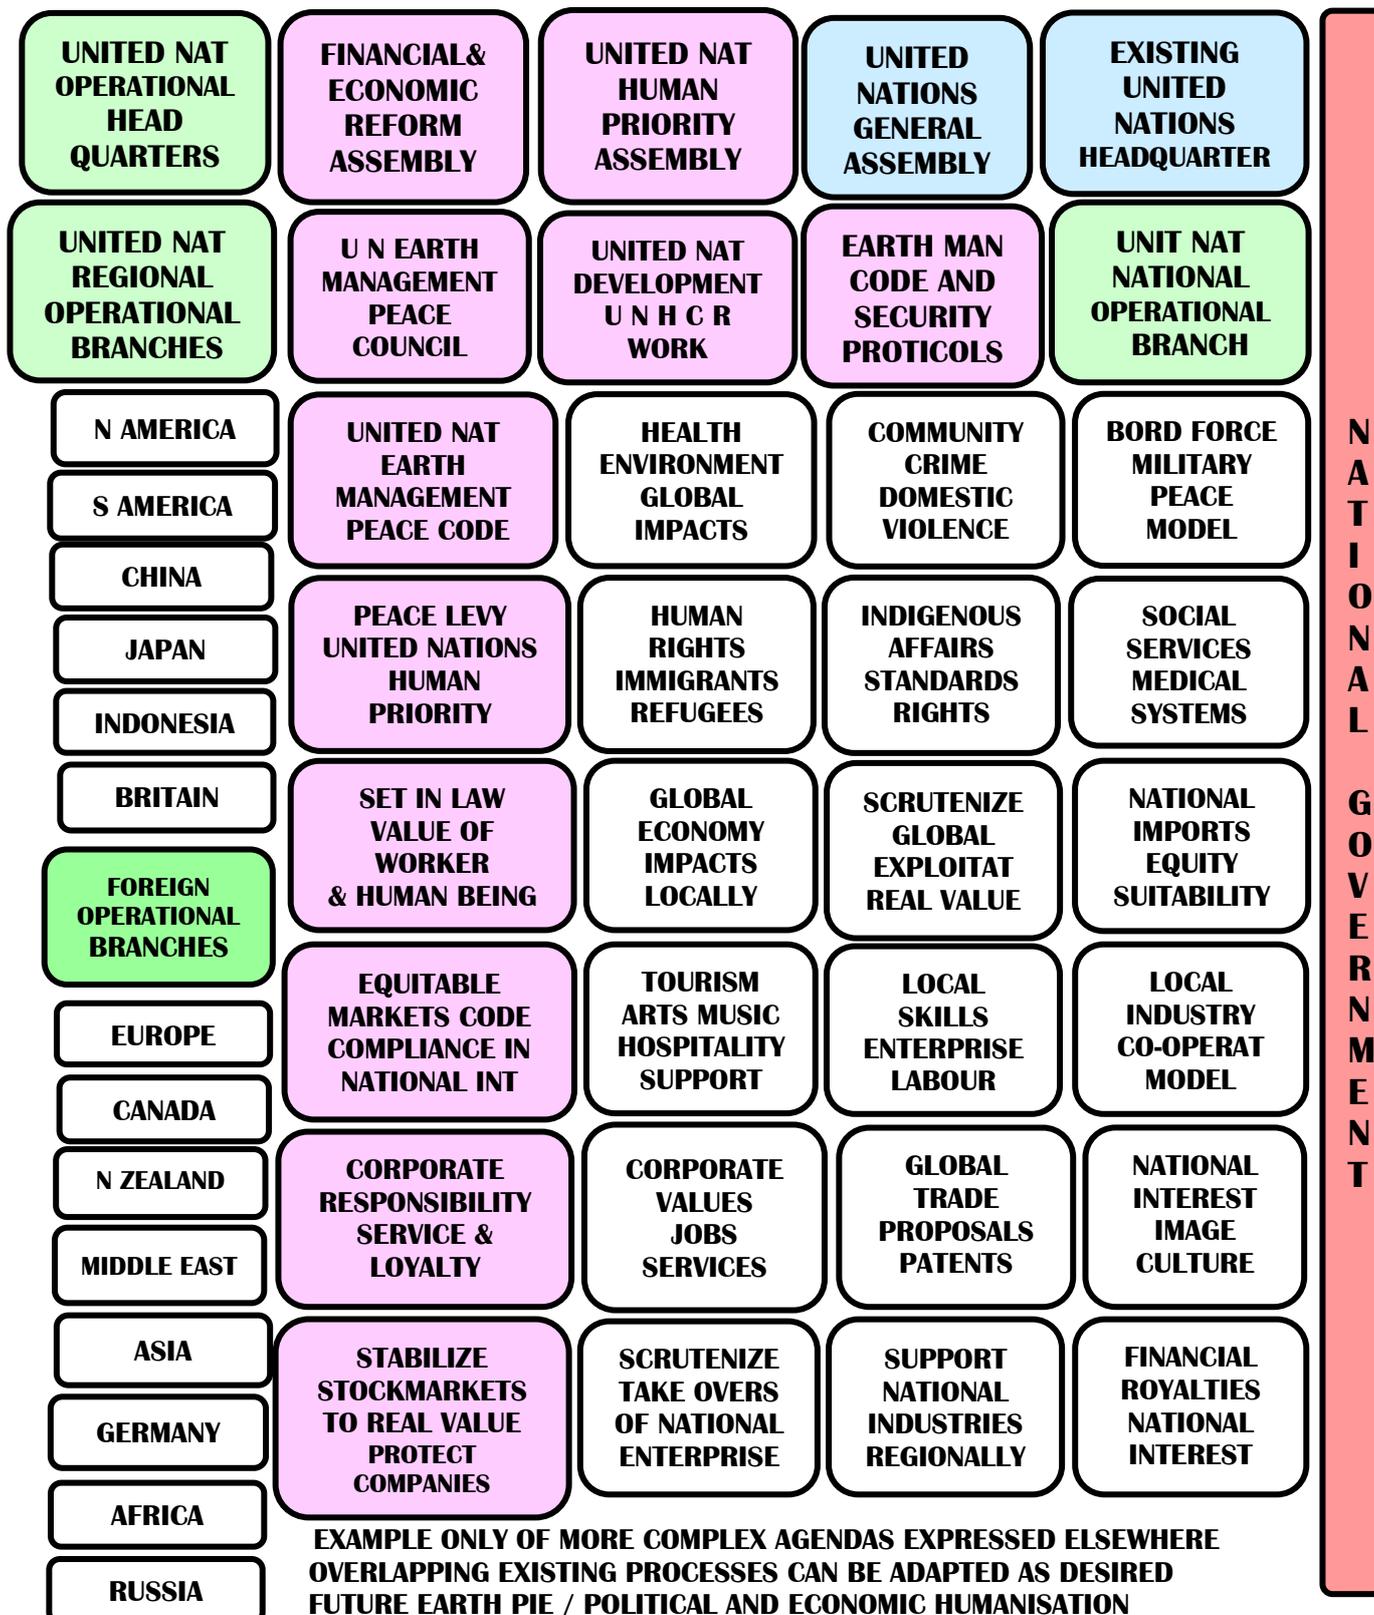

The system connects with the people in the suburbs, the homeless and disadvantaged, indigenous communities, and networks with government social services departments, the court system, victims of corporate fraud, or discrimination, mortgage closures, business failures, charity and aid groups, including Amnesty International, UNNHCR, to lobby government in defining need for social policy and compliance with Code standards.

**UNITED NATIONS EARTH MANAGEMENT AND PEACE CODE, AND COUNCIL, AND NETWORK OF LINKS TO UNITED NATIONS CORE FUNCTIONS AND OPERATIONAL BRANCHES. SHED PAST HABITS FOR 21 CENTURY SOPHISTICATION AND PEACEFUL COEXISTENCE. NEW UNITED NATIONS STRUCTURE DIAGRAM 04/05/20 GDM**

**THE PRIORITY OF REFORM IS FUNDING AND ACTION TOWARDS A SAFE EQUITABLE EARTH. HOUSE AND INTEGRATE REFUGEES IN PROTOTYPE SAFE ZONES IN THEIR OWN CULTURAL ZONE FUNDED BY WAR MONEY. SET UP A FILTER IN ALL NATIONS TO PROTECT NATIONAL INTEREST AND SUITABILITY OF GLOBAL ACTIONS.**

**FUTURE EARTH PIE  
NEW UNITED NATIONS ORGANIZATIONAL LINKS  
BETWEEN REGIONAL AND NATIONAL OPERATIONAL BRANCHES.**

**NATIONAL GOVERNMENT**

## **SYSTEMIC PROBLEMS WITH UNITED NATIONS AND SECURITY COUNCIL**

The United Nations has a wonderful network of facilities and goals and forums developed over time but the lack the power to implement their programs because of lack of funding or an organizational system within nations handicaps them. Security council consensus is often not possible. Member nations are polarised and super powers dominate and go to war by winging it without un sanction and form coalitions to justify their own actions. Sanctions handicap small nations businesses and economy and enterprises of their people and should be removed as a diplomatic strategy as they can be pushed too far.

*Confrontational diplomacy by world leaders' explode the risk of another world war.*

Currently it is assumed the military and war will bring peace but it only entrenches divisions and brings hardship to communities The leaders can be distracted by their image and political aspirations. It seems to be accepted that the killing of human beings and destruction are ok for the cause of peace, if it's in a foreign land and you keep it out of the media. Coalitions of nations including NATO should be discontinued. Imperial Coalition Leaders joined the battle between Hungary Austria and Serbia and started WW1 without a cause to fight sacrificed their young men at around 4 million casualties and led to WW2.

Coalitions give justification to war-mongering of coalition members without UN sanction.

All nations must have independent peaceful diplomacy. All nations must stand by their historical record of peace or war since birth of the UN. It takes greater strength and power for leader to be humble use diplomacy, and not go to war. Politics and leaders are responsible for wars and cold wars. Let them change their rhetoric to appease the fears of their perceived enemies. We can't clock up another 100million lives lost in the 20<sup>th</sup> century in war, again in the 21<sup>th</sup> century. The arrogance and a lack of duty of care towards earths populations, of our leaders must be curtailed and all nations comply with models for peaceful coexistence. The standoff between Israel and Palestine defies all human rights protocols; where war has perpetuated since WW2 and Palestinian land whittled away and settlements expanded into Southbank and Gaza against UN resolutions and Palestine surrounded by stone walls contained under surveillance by checkpoints. More definitive balanced earth management is desired to deliver just independent adjudications but the UN has been powerless to stop this with America supporting Israel's unrelenting occupation of Southbank and Gaza and suppression of Palestine including dividing walls and checkpoints. United Nations Forums are Infrequent and proactive implementation of agendas is not possible without an organisational structure to implement them. The leaders focus more on the politics.

**In UN News today 24/7/2020 it states**

### **Security council stalemate frustrates relatives of Syria's Detainees**

'Families of the more than 130,000 people believed to be detained and forcibly disappeared are deeply frustrated by the security council's failure in Syria to unite and make progress on the issue the 15 member organ was told on Thursday'

The United Nations Failure to unite nations throughout its life time deem it illegitimate as an entity to unite Nations and deliver its core duty of care. It lacks an organizational system and needs persons whose core duties are to sort out urgent critical human crises and needs to be replaced by networks able to deliver effective prompt actions and to prevent crises from occurring.

## **REVENUE EARNING CORE OF UNITED NATIONS**

The United Nations must be Funded by all nations as documented later by peace levies from different sectors and reduce military activity, and their role internationally, due to U.N. reform United Nations operational facilities, new Operations branch headquarters and regionalization system. We cannot rely on donations alone for something as critical as the united nations. It must have a revenue earning centre firstly with a levy on each nation on a scale based on the scale of the economy and the restructured form of the united nations will provide more services to each nation and ease their burden in their best interests in many contexts including code regulation. Peace levy allocations include all nations, the defence industry, government military budgets, uranium mines and plants, corporate off shore tax havens, Hollywood, wealth dynasties. Everybody get on board and believe in the cause, to balance excess wealth for peace and to the needy. Everybody get on board and believe in the cause, to balance excess wealth for the cause of peace and to the needy.

## **PEACE AND EQUALITY NOT WAR OR EXPLOITATION.**

**These are the core underlying truths for United Nations protocols.**

**Demilitarise and live in peace with no more war. Stop funding the war industry it perpetuates the wars and the arms race. Spend war money on nation building after war, housing refugees and elevating disadvantaged people in all our cities.**

**Fund the peace industry and sustainable environmental agendas with the war money and humanize all political systems, support needs of the people,**

**the left move right the right move left, cull the corruption of the ruling class,**

**cull the excesses of capitalism and globalization to increase living standards, quality of life and job security of the people. Regenerate the earth and suffering people.**

**Empower all nations that there shall be NO MORE WAR. Find the formula for peace.**

**All Nations look after each other as citizens of earth, as one human race as one world.**

### **DIFFUSE THE ABSOLUTE POWER OF LEADERS AND POLITICAL POWER**

The absolute control of political leaders and the dominance of corporate identities in political outcomes must be regulated. Governments are blind to effects of globalization for decades and suddenly attempt a quick fix when we are already into a discount life in a discount world, but leave massive populations in impoverished conditions while boasting about a thriving economy and spending billions on unneeded weapons, Value for money is to keep your own industries jobs and culture and not adopt generic values for everything without anything to believe in and without striving for high standards in everything like generations decades ago did. Service to the public in our best interests is gone. Franchises and brand name companies and contract and part time employment, exploit our workers and destroy our industries in the desire for a quick buck with minimum production costs, placing financial risk on others or unsuitable products with limited ranges of choice driven by fashion to make more profit.

### **OUR PLANET UNITE**

We all expect a good lifestyle, and a good job, to fulfill our dreams with a career with fair pay & secure work, without disadvantage; to have a family in the suburbs and bring up the kids in the spirit of love and pride in the Nation and around the world in all Nations. We must define a pathway to a transparent proud united future earth with human values as a core ingredient, by restructuring the United Nations and extending a code of consistent values and protocols, internationally into and between each nation. We must all be proud of our nation and proud of our planet. We must all believe in ourselves our cultures and a future equitable and peaceful earth. It must be not only about me, it must be not be only about our country, it must be about all of us in the whole human race as brothers and sisters from mother Earth and father Sun.

### **VALUE OF A HUMAN LIFE**

Amend International Law to declare the value of a human life in one's own nation, and of a foreign national, are equal and, if murder is the charge for killing a person at home, to kill residents of a foreign land or by warfare and in tens, hundreds, and thousands, is a crime against international law and defined as genocide. The damage caused, the impacts on communities and displaced families, including refugees, is the responsibility of the force that created the damage, and they must reinstate the ruins and provide habitable safe environments for victims and repair their suburbs to the benefit of the nation affected. This shall be retrospective with reference to previous interventions, where reasonable action should be taken in support of the subject nations and communities affected. Implied blame and responsibility rests with the offending nation who is causing harm to its population or causing divisions or war.

### **WAR AND ALL CONFLICTS MUST BE DECLARED ILLEGAL**

### **DRAW A LINE IN HISTORY NOW TOWARDS A PEACEFUL EQUITABLE WORLD**

**Let our generation of the 21<sup>st</sup> century be remembered for the architects of change to peaceful non-confrontational diplomacy and friendly equitable and peaceful world.**

**Let there be peace on earth, for future generations. The lives of the young shall no longer be sacrificed in battle, without living their lives and having families for the whim of our leaders who deem to act in ownership of the nation without consideration of the best interests of their populations.**

## **DEFINE NATIONAL IDENTITY RELATIVE TO THE WORLD**

Earth Command attempts to define what is the heart and soul of a nation and create a model of who we are relative to our historical background, geographic location, cultural identity, climatic footprint, resource potential, environmental condition, economic potential, academic potential, individual potential, disadvantaged communities, health disabilities and considers the effects of industry and technology, foreign ownership and trade, with the aim of preserving national identity and preserve the human element in all things and reducing personal stress levels from the effects of advancing technology and corporate and political systems. We must plot a pathway towards Peace rather than build the Military assuming you have enemies to protect yourself from and change the mindset to working towards peace with peace agreements between individual Nations and globally. Build the relevance of the United Nations to all nations by regionalization and consistent voice. Model the functional and economic benefits of demilitarization assigning those resources to emergency services disaster relief environmental Programs, Humanitarian programs, protecting the nation's interests in foreign affairs, industry, manufacturing, investment, financial markets, financial institutions, monopoly by corporations to protect skills and jobs, evaluate imports and move towards self-sufficiency and producing products and enterprises that are safe and relevant to your own needs and protect your own interests. We must monitor and create a model of our nation relative to other nations, including national identity relative to cultural differences, factors of scale, location, population, military might, economic system, whether disadvantaged or prosperous level of industrialization or development, and human rights record, for an equitable balance in the global community.

## **CONTAINMENT OF EVIL FORCES**

Define the origins of evil and work out strategies to identify perpetrators and contain significant outbreaks and define locations for future detection.

1 criminals, 2 murderers, 3 mercenaries, 4 terrorists 5 political Fanatics, 6 drug dealers 7 Criminal Gangs, 8 mafia movements 9 Kidnappers, 10 Extortionists. 11 financial scammers, 12 internet scammers 12 Institutional corruption 13 human, slave, and sex trafficking.

## **NEED TO ENFORCE GLOBAL VALUES**

**1 To protect the right to life of all human beings**

**2 To protect all manmade development, historical, or present day, cities, suburbs, and homes including our history, historical sites and architecture.**

**3 To protect the right to life of the planet**

**4 To protect the right to life of the atmosphere**

**5 To protect the right to life of earth's resources**

**6 To protect the right to life of plants, forests, and vegetation.**

**7 To protect the right to life of earth's oceans.**

**8 To sustain a healthy safe and productive planet**

**9 To support & sustain the life of the human race and all creatures and vegetation, and implement a sustainable productive economically viable environment into the future.**

## **REGIONAL COOPERATION**

**All cultures and regions contribute to the guidelines and represent on Regional Councils under the authority of the Executive UN Council who manage and police the Code. If any Nations are unable to agree based on the cultural beliefs or religion of the nation. then they shall prepare their own amended agreement and submit for tabling as an appendix to the World Management Code, for special circumstances. Leverage can be applied over time, with nonconforming nations to bring about reforms which bring them closer to compliance with the standard agreement. Non-member Nations will have an operating profile administered by the UN and will be communicated with for non-compliance.**

**This U N World Management Peace Council negotiates and manages guidelines and models of a code of earth management and human rights, for all nations, and a separate platform of authority to articulate consistent standards and equitable and humanitarian practices in everybody's best interests.**

- **to encourage co-operation between nations**
- **to build economies of love rather than greed**
- **to prevent wars and refugees and regenerate war-torn zones**
- **to create subjects who are loyal to their leaders and proud of their country**
- **live in a comfortable home with good sanitation, services, and water supply**
- **with the opportunity to work to provide for their family to be happy and productive**

**In all culturally sensitive zones models could be negotiated for settlements or negotiations on humanitarian violations. The West may have to forfeit some of the excesses of capitalism, and the East comply with recognised standards of human rights and all nations recognise their responsibilities as part of one world family, and dedicate more of their wealth to an urgent, managed objective to uplift the situations of impoverished populations and contribute on a global scale to the needs of developing countries and the health of national budgets and productivity.**

## **NATIONAL MODELS**

### **A ECONOMIC AND FINANCIAL MODEL**

#### **B BASIC LIFE SUPPORT MODEL**

1 food production and diet control 2 minimum housing model 3 productivity model 4 work model 5 spiritual model 6 education model 7 Arts and Recreation model  
8 Communication, and computer systems model.

#### **C INDUSTRIAL MODEL**

1 relative pay scale for employees 2 working conditions 3 conditions of employment 4 level of job security 5 exploitation model by employer.  
6 Equitable comparison with other nations. 7 housing affordability

#### **C ENERGY MODEL**

1 Coal fired Power 2 Hydro Electric 3 Nuclear Power 4 Gas Power 5 Solar Power 4 Wind Farms  
5 Other options

#### **D ENVIRONMENTAL SUSTANABILITY**

1 Climate Change Management 2 Manage effects of Environmental Model 3 Innovation Sciences Coordination 4 Physical Structure Housing & Cities 5 Industrial Development 6 Technology, Internet Regulation and Internet Security

#### **E DISEASE AND SOCIAL CRISIS**

8 Medical Science and Research 9 Mental health and Disability Care 10 Infectious Disease Control 11 Conflict Sectarian Divisions and Terrorism Model 12 Refugees, Disaster victims, the Impoverished Model 13 Containment of Evil; criminals, political fanatics, terrorists, drug trade, rapists 14 Human Slaves and Sex Slave Trafficking.

#### **F CLIMATIC SUSTAINABILITY**

1 Pollution model 2 Vegetation model 3 Geographic model 4 National Parks 5 wildlife protection 6 The Oceans 7 sea creatures 8 Timber Industry. 9 Resource industries 10 Manufacturing industries 11 Agricultural and Farming industries.  
12 The Health Industry, Medical and Hospitals 12 Industrial waste 13 Sewerage waste 14 War Contamination 15 Nuclear waste

#### **G RESOURCES MANAGEMENT AND INNOVATION**

To provide efficient delivery of services to communities with Projects focussed on environmental protection, climate change, sustainable resource management, clean and innovative technology for mining and energy enterprises, and communication systems. Refer to section on Demilitarization and military resources offsets.

#### **H PEACE COMPLIANCE MODEL**

### **(c) 3 YEAR AMNESTY ON WAR**

**This is a proposal for a focus on peace in international diplomacy including civil wars, political divisions and terrorism. war does not make peace and human sacrifice in war is unacceptable. All human beings must be equally respected by all other races and inhumane practises by some nations or religious extremists, must be stopped to comply with 21<sup>st</sup> century humanitarian values. *No one likes to live in fear. No one should live in fear of their lives from conflict, suppression famine, or impoverishment, or die as a consequence of neglect by a regime and its government, or from aggression, or die for a cause.***

***A 3 year amnesty shall be decreed on all political divisions, wars, civil war, suppression of other nations or races and amnesty on internal sectarian fighting, including militias and terrorists, and suppressive dictatorships. this shall be an amnesty on fear and no one shall live in fear of their life by effects of conflict, civil war, or terrorism, or casualties of each cause, or neglect, because excess money spent on the military, wars and on the state, must be assigned to impoverished or disadvantaged populations in all nations of the world. Every nation shall be responsible for its own backyard and the support of the united nations and regional neighbours shall be made available for a peaceful coexistence between ethnic or religious groups. in many cases while there are refugees, decimated suburbs and victims of the carnage of wars, like Syria, Yemen, Afghanistan, Gaza, Palestine, Israel, Egypt, and many middle eastern nations and many nations in Africa, South East Asia and other locations, lives are at risk, and urgent action to house suffering people in integrated communities within their own cultural zone, is required to reverse existing emergency situations.***

***They may have been conditioned from a young age and do battle and go to battle at a young age. The control of their elders may give them no choice and they may even believe the doctrine to kill terrorize or discriminate against others of different creeds.***

***The systemic culture is at fault not the brainwashed individuals or communities conducting atrocities. Where there is entrenched cultural conditioning of offending religious or ethnic groups, doctrine must be diffused and interpretations converted to a philosophy to co-exist and love thy neighbour. We are all part of and have our own impact on this same world and our actions effect all human beings and nations.***

***Let there be peace on earth, for future generations.***

***the lives of the young shall longer be sacrificed in battle, without living their lives and having families for the whim of our leaders who deem to act in ownership of the nation without consideration of the best interests of their populations.***

### **CELEBRATION OF THE EARTH FESTIVAL**

**Concurrently with the war amnesty at the planning stage there shall be a celebration of the Earth and Country festival, around the world in every nation to celebrate each nation and its people in all its cultures and a celebration of Families and their children and a message of hope for future prosperity and peace.**

**This shall be a celebration of the earth and the human race and our achievements and solidarity to work together in harmony to resolve the challenges of the planet and the human race with unprecedented technological advancement to ensure the human element remains in all things and disadvantaged communities are elevated from impoverishment and promote respect for other nations and their ethnic groups in an expression of good will and forgiveness for past actions against one another. The sacrifice of human life in both sides in both communities of a conflict is intolerable and the financial, cultural, and physical costs ensure that no one ever wins and the future of the planet and its environment is at risk and requires the solidarity of all nations, in a common cause for peaceful coexistence to protect the earth to ensure its survival and the survival of the human race.**

## **EARTH CELEBRATION DAY 1**

**This festival shall be held in the initial planning stages of the War Amnesty**

## **EARTH CELEBRATION DAY 2**

**This festival shall be held after the War Amnesty has run its course**

**Staged demilitarization shall be introduced after the war amnesty with peace and cooperative agreements cemented in place and the weapons industry must restructure its factories and science towards sustainable industries to design a sustainable system of suburban fabric to lift the slums and ghettos, and the homeless, and impoverished nations to a reasonable habitable environment with reasonable standard of living and hygiene and to building the fabric for a future earth in the context of artificial intelligence and future sciences.**

**LET ENEMIES BECOME FRIENDS TO MUTUAL BENEFIT AND PROSPERITY**

## **(d) PROTOTYPE NATIONS AS SAFE ZONES**

these may be needed in different cultural zones possibly 5 worldwide.

These shall become standard available packages for implementation in different locations by different teams with different sponsors along sanctioned guidelines. They are also intended as a bribe in negotiation of war redundancy offers, in small nations to compensate for the financial rewards perpetrating the war, and induce demilitarization, elimination of illegal enterprises or drug or human trafficking and induce harmony and human rights.

1 INTEGRATED SAFE ZONES 2 INNOVATION NATIONS 3 REGENERATE WAR ZONES  
4 LOCAL SUSTAINABLE SYSTEMS AND PRODUCTION 6 EDUCATIONAL SUPPORT  
7 SKILLS TRAINING ENTERPRISES 8 HABITABLE SAFE SANITARY SUBURBS

## **DEVELOPMENT ASSESSMENT TRIBUNAL**

All projects must have a productive business model to the benefit of the host nation. For assessment, feasibility, accreditation, and approval of humanitarian projects.

### **1 PROJECT OPTIONS AND REVIEW**

Proposals from all geographic locations must relate to remedial action to reinstate communities known to be in urgent need; like restoration of war zones, integrating refugees, or peace oriented political reform processes. Review is required to achieve, consistency, sustainability, and define the need and benefits to the nation and eliminate exploitation for greed or profits.

### **SYSTEMS PROPOSALS AND REVIEW**

Locally compatible, sustainable, organic farming systems, building systems, green energy, services, transport systems, including electric prototypes only, and innovation enterprises, with the aim of achieving, self-sufficiency of every nation before exportation and safe, serviced, sanitary, suburbs with as small a foot-print on the earth as possible.

## **IMPLEMENTATION OF JOINT PROJECTS**

All projects are joint ventures with the host nation with the approval of the host nation, to ensure nation building effects, jobs creation, and skills benefits, to local communities and create local sustainable enterprises and lift their lifestyle.

All Nations need to fix the degradation of their sacred lands from the ravages of over development since the beginning of civilization and wars and must recognise that they can't afford the wars and put policies in place to fix the damage and drive development of the nation and the economy into the future in a sustainable scientific way to keep up with the rate of advancement of technology. All refugees and others be resettled back into their homelands as there will be opportunity and resolution of human rights violations and wars and a focus on compromising traditions to improve productivity as a nation.

## **BOND POLARISED SECTORS TO SUPPORT EACH OTHER**

United Earth Pie transcends all divisions and transcends party politics as a fair deal for every person and every sector with compromise from different polarities to support each other as a team without confrontation with a balance that's favours everyone but to reform excesses and exploitation to give everybody a reasonable secure and safe life and better economically.

## **STOP WEAPONS TRADING**

Funds for military campaigns and weapon trading shall be reallocated towards humanitarian nation building peace projects in the aftermath of centuries of wars embarked upon by the human race since the beginning of civilization. To break the culture of war for the 3 Year duration of this amnesty will start the transition to a peaceful world for future generations and more peaceful dialogue between nations to prevent conflict, war, destruction of our heritage, and refugees, in the best interests of our national economies.

## **INNOVATION NATION SAFE ZONES SPECIFICATIONS**

This project is intended to illustrate a model for establishing a peace concept for earth in the 21<sup>st</sup> century generally modifying beliefs and practices which are archaic to suit the modern age. in reality hoping that some direct action is taken towards peace and stopping the needless killing of innocent human beings going on around the world and promote the philosophy of we are one world and love thy neighbour and share and save the planet. the mindset that all nations must have substantial military might to be replaced by the desire to downsize & donate weapons to a un regulatory force sanctioned and operated by all contributing nations. there shall be a weapons stockpile and the impact of military action on the planet and its heritage managed.

### **TARGET POPULATION ANYONE FROM ANY NATION**

all refugees in limbo or detention as a result of terrorism and sectarian violence in their homelands to take the strain of nations globally, to physically and economically provide for them and keep them in their cultural zone and ultimately make countries creating refugees being responsible for them and build the nation by demilitarizing and spending the money on nation building projects and establish a peaceful environment for their populations particularly from impoverished lands who wish to be educated on sustainable and earth science to regenerate their own country. anyone with technical expertise who can contribute to growing or servicing the project

### **STAGE1- REJUVENATION NATION**

permanent refugee support and processing facility, permanent housing, support services, retail, education facilities, agriculture and food production general businesses. scientists, professionals and specialists and hospital.

### **STAGE2- INNOVATION NATION**

advanced technology, factory production, construction, engineering, and manufacturing, export of products. local government system. plan for population growth

### **STAGE 3- TRANSPORT AND INFRASTRUCTURE**

internally and to link with external country and border security. expand technologies and general development. clean energy systems integrated in allocated services nodes not individual systems that can interfere with the suburban environment.

## **INNOVATION NATIONS**

The Innovation Nation concept of a totally- sustainable, futuristic community for displaced persons, with a guaranteed safe home and focus on the future, may provide residents a new life with something to believe in as part of a new integrated nation, and forget the memories of harsh times that drove them out of their own homelands and a political system that could not keep them safe. Beliefs and practices that may have resulted in sectarian conflicts or terrorism in their nation of origin must be prevented from repeating in their host country. The host nation fully benefits and expands its economy at the same time. These Innovation Nations are proposed sustainable developments as a model for the future in strategic locations that will contribute to the economic development of the host nation and the region, repair the damage caused by war in context with the cultural zone, and induce a state of Peace and cooperation in the region. Initiate iconic symbolic projects on the scale of the Pyramids and the Statue of Liberty as a symbol of peace in the region. Innovation nations are safe zones around the world to protect political refugees, victims of natural disasters, impoverished populations under a trial political and social system of government under UN control and an inducement towards ending wars. Innovation Nations display trial political and social systems which modernise religions and political practises where necessary to protect human rights to suit the advanced civilization of the 21<sup>st</sup> Century. Possibly Chinese ghost cities could transitionally house refugees currently in camps

**(e) INDUSTRIAL REVOLUTION OF 21<sup>ST</sup> CENTURY  
POLITICAL AND ECONOMIC HUMANIZATION  
GREED FOR PROFITS IS EXPLOITING THE WORLD.**

Greed for profits and the compromise of the values and human rights of world communities.

Globalization and Monopolization by multi-nationals has been a cancer engulfing us globally, like Stocklands, West Farmers, Lend Lease, Woolworths, Coles, American and general franchises, and the Chinese intrusion, in trade, real estate, company take-overs and causes a devaluation of local culture. Downsizing and automation, robotics, remote operations, foreign telephone banks, voids service the public, dries up job opportunities, kills local businesses, voids responsibility. Wars, mines, developments, invasive enterprises, clearing, and neglect by mankind is handicapping the fight against climate change and environmental protection and human rights violations.

We must define a new direction and methodology on the back of the brilliant scientific, technological, industrial, and environmental successes of our modern age. We must believe in ourselves, and write our Magna Carta; start our industrial revolution of 21<sup>st</sup> Century for the sake of our survival. All Nations and all Regions must contribute to the intelligence of our doctrine of change by drawing a line in history now in the 21<sup>st</sup> Century to move forward, remove the shackles of history, from handicapping the process of change. We must control the excesses of, bureaucracies, capitalism, and greed at the expense of the wider majority of the population where the rich get richer, and public figures are rewarded excessively beyond those who achieve greatness at the highest levels of their professions or careers. There must be a doctrine of behaviour for economic management to prevent practises that exploit and financially handicap the public in the context of the global financial crisis and the current fragile nature of world economies. The system must change from first principles with a direction towards winding back the global economy where everyone is dragged into the current of activity, winding back foreign investment and global trade to ensure all nations protect their own interests first. Politically we must work back from a real-time perspective of earth and everything in it, in the current context of reality. We must model and compare the national estate and operations with national economic commitments and recommend outcomes of how the budget be spent relative to servicing the public and protect our best interests, the economy, protecting our rights and protecting us from harm.

**RESPECTFUL INDUSTRIAL REFORM**

I believe we must legislate for unions to forfeit the right to strike and forfeit militant action and do a trade off with the Business community and write up new legislation to protect the interests of both sides. We must redraw the face of industrial relations into a modern form in context with our highly technical mechanised world and the dynamics and expectations of a modern society.

Spend energy on positive reform developments and productivity and not vandalise good relations with employers with a culture of confrontation as they pay the wages. Redraw legislation for a happy balance where everyone wins and no one loses because jobs are becoming scarce and new ground must be covered to adapt to this modern technological age and build new industries or develop the regions to create jobs. The economy needs not to be affected by militant action and strikes in major industries like construction and ports can be costly to the employer, who should not operate at a loss due to industrial extortion or other actions. We need greater job security. wind down work contracts and casual and part-time jobs and for permanent positions with respect for seniority and loyalty to prevent stress related conditions leading to suicide and breaking down of the family unit. The many businesses conduct their business internet without a physical identity. In the context of all this, a reform of in corporate practises must be defined to gain the respect of the community and employer organizations must not exploit workers compromise conditions or aggressively shed jobs to save money or increase profits. Both must work together as one in everybody's best interests, and make unions attractive to workers to increase union membership. The challenges of automation must be factored in, and the trend towards offshore labour and manufacturing, foreign ownership, foreign phone banks, and the importing of cheap labour including work visas and importing cheap products to undercut Australian products must be stopped or reduced to levels that don't compromise Australian industries or jobs. Reverse customer self-service counters and provide staff to service the public.

## **WORKPLACE HEALTH AND SAFETY**

*The unions provide valuable management of workplace conditions and their inspections are essential for workplace safety and their management of working conditions suitable for the various workplaces must be expanded upon, and legislated for in a modern context.*

*Private operators should be closed down and this become the exclusive specialty of unions in the interests of consistency and high standards for the safety of workplaces.*

## **GLOBAL CORPORATE REFORM**

*It is necessary to negotiate the national equitable model in the national interest of every nation.*

*Historical record is the main basis of actions with as much transparent information as possible without breaching national security to ensure equitable checks and balances exist between all nations, in the interests of all nations. Each nation negotiates an earth management code of values for optimum models as reasonable goals for compliance to correct excessive practises remove exploitation of other nations, or their own populations and become good world citizens.*

*1 historical human rights violations*

*2 suppression of their populations*

*3 exploitation of developing nations resources*

*4 exploitation by free markets and globalisation*

*with reduced opportunity or potential not in the national interests.*

*a economic b resources c industrial d workplace e cultural*

*5 investment and development by superpowers in small nations of in appropriate scale and with political implications.*

*6 offset historical foreign affairs and military excesses for nation building, environmental reconstruction, and greening suburbs.*

*7 levy the war industry and financial dynasties driving global political economies to support the disadvantaged, provide secure employment including senior experienced unemployed.*

*.8 regulate political forces perpetuating the war industry for profits.*

*9 smuggling in people, sex, drugs, wildlife, weapons, stones, resources.*

*10 regenerate the earth Study the state of the environment of past historical times and the impact of wars and current wars and man's development on earth and whether greening and sustainable projects are necessary to provide reasonable habitable environments for all nations using modern science in ancient highly populated geographic locations and elsewhere. nation building projects and greening are also urgently needed to fix damaged suburbs in war zones and house refugees into safe zones in their own cultural zone.*

## **THE FINANCIAL CRISIS**

*11 There are still many victims globally, who lost businesses, jobs, their investments, or their homes and their lifestyles devalued, from the financial crisis. There has been no justice to businesses who perished or people who became bankrupt or lost their homes or their livelihoods. The banks and finance sector the culprits of the crime were let off the hook and in fact had their liquidity propped up while the people were left to suffer in financial ruin.*

## **PROTOCOLS FOR COMPANIES/ RESPONSIBILITY OF ALL COMPANIES**

- To protect Australian interests and Australian enterprises..
- To provide Australian jobs to reduce unemployment
- To protect Australian industries and resources, skills and jobs.
- To ensure profitability for Australia equitable trade and fair pay to workers.
- To NOT transfer funds to hedge companies or engage in phoenixing. and to not evade the payment of due taxes and royalties.
- To engage in sustainable practices as first priority if possible in context with the functionality of the specialty.
- To Contribute to the community and the needs of customers and employees by providing jobs and services from investment capital funds.
- Profiteering is not a valid reason for retrenchments or offshore labour or user pay.
- Value must be placed on a job and the wellbeing of workers and providing adequate service to customers and defined in industrial law.
- An employee or Human being must be of value and respected and their dependence on the company to support their family recognised and defined in industrial law
- Companies of a defined size shall advertise a defined percentage of secure entry level work for average or disadvantaged school leavers for work experience and to guard against systemic reliance on the dole or welfare.

### **THE VALUE OF AN EMPLOYEE.**

To recognise the value of an Employee to the company and adapt their role to suit future trends in support of job security and their support of their families and. in Australian Interests to minimise unemployment numbers and dole payments mental health issues and potential suicides or family breakups and maximise stable family units and the positivity of their children. A prosperous healthy society will provide a stronger customer base to sustain profitability. Define in law.

### **VALUE TO A COMPANY OF EXPERIENCED STAFF**

The Superior experience of senior employees Loyalty, and Knowledge of company systems and operations, and their mentoring role to new staff must be recognised. Knowledge is safety factor in avoiding disaster. Secure workers with a guaranteed reasonable income will perform better and be able to provide for their families and pay off the mortgage.

### **VALUE TO A COMPANY AND RIGHTS AND DUTY OF CARE TO CUSTOMERS AND WORKERS.**

Customers can be considered investors in kind responsible for its wealth and companies should give benefits back to the community as a result and not exploit them.

**ICONIC TOURISM CENTRES  
TO ENHANCE NATIONAL IMAGE  
SUPPORT TOURISM HOSPITALITY AND THE ARTS**

*This is a model designed to reverse the demise of our cultural brand, and skills and the arts generally and earning capacity of arts careers by generic imported products of globalization and to enhance the authentic national image. Iconic Tourism Centres are proposed in selected Tourism zones including in the regions and National Parks of a scale commensurate with the demographics and location in support of a unified Tourism message and enhance our tourist attractions creating possible destinations for inclusion in bus tours and improve the economy of regional areas and as a facility for the community and families and providing employment opportunity in the regions for musicians, songwriters, artists, cottage industries and culture, in communities as part of a proposed support network for critical jobs and industries. Our tourism industry is generally decentralized including specifically the Sunshine Coast which spreads from Glass House Mountains on the highway from Brisbane to Nambour in the hinterland both badly neglected and need a catalyst to attract tourism numbers and beachside neglected areas like Caloundra, Kawana and the Coolum area of Ninderry, and parallel situations all the way to North Queensland. Provide Iconic Tourism Centres with consistent facilities to display authentic tourism products, space for the Arts and Music promoting the arts, music drama ,and song writing, and Australian culture in all communities constructing venues in selected locations in cities regional areas and national parks as part of arts funding for a permanent facilities to reflect positivity in the community, and a festive atmosphere as tourism attractions and suitable for families and the disadvantaged where over decades access to families in tourism has been diminished by specialization in upmarket expensive facilities and restaurants eliminating many family friendly locations. Provide jobs in music and the arts where opportunity has waned with modern trends in the industry. It is proposed to develop Family friendly food chain with /restaurant/and bar featuring an art gallery gift store with daily entertainment by local songwriters and performers to give musicians consistent work to present an Australian Tourism Image for low priced but high quality food aimed at families and particularly in Holiday destinations where food outlets and restaurants have become overpriced but with a broad menu in takeaway and dine in capacity to provide diverse but generally healthy food.*

***Funding proposed***

***1 as a permanent Arts grants as payment to artists and musicians in our communities,  
2 from tourism money, 3 capital works,  
4 to a new funding model for National cooperatives in the regions.***

*This model could be followed in all nations experiencing similar effects from globalization. with a focus on the demographic of 18 to 35, and dominance by fast food chains ownership by multinational monopolies focusing on cutting corners to save costs smothering local identity and authentic arts and hospitality outlets. This proposal aims to promote a strong Tourism image and authentic national identity to provide access and context for families as well as the young demographic and high- flying international tourists.*

## **REFORM ETHICS OF THE LEGAL SYSTEM FOR A FAIR TRIAL FOR ALL.**

It is commonly known from historical practice, that the entity with the most financial capacity or power, most often will win in the courtroom however, in the interests of justice and freedom for the people, the age-old legal principle, of what is reasonable practise under the circumstances, should be applied in the ethics of corporations, lawyers, the legal and Court system in their servicing of the public who are vulnerable. Outcomes of cases must not depend on which judge you may get depending on the judge's reputation or what mood he is in.. On each end of the scale you may win or lose the case more often. Presentation of evidence and interpretations of a jury and court procedures and appeals must be unbiased and not disadvantage defendants financially or with unreasonable processes. Elitist notions in the legal system inflating costs must be regulated and an intent to provide service to the public, and client their highest priority above pomp ceremony and overcharging for the components of providing a legal service in the interests of the firm and court proceedings, with a higher priority than the interests of the client or their ability to afford legal representation. Systemic Legal practices and Police operations must be reviewed to ensure unbiased, professional, passive, evaluation, by communication with all parties to achieve a streamlined cost effective fair system to reduce time frames and increase the affordability by the public so they are not swallowed up by the system without receiving the justice they might deserve.

## **INDEPENDENT REFORM AND MEDIATION AUTHORITY RECOMMENDED**

A Permanent independent ongoing Mediation authority additional to the existing Legal Authority of the system is recommended to streamline the system so it is efficient and affordable to protect the interests of the public and businesses and to scrutinize all court systems and procedures, and official positions. Standards protocols, fees, and charges, must be reviewed and claimants able to voice complaints where the system is handicapping their cause. This Review System shall cover all levels of the process with the intention to define and manage the condition of justice and human rights relative to the Court process at all scales in the Magistrates, Family, the Supreme and High Courts and the roles and most effective reasonable practise for each process from start to finish to ensure none of the participants are exhibiting favouritism on the basis of status, wealth or political persuasion and all defendants have the right to reasonable fair justice which reflects the truth and the correct context of circumstances surrounding the evidence. Outcomes must not be driven by race, personality, socio-economic background, eloquence or Self-image, status in the community, wealth status, or whether a company or corporation uses legal delaying tactics as a weapon to manipulate the case with the intention of deterring the defendant from proceeding with the case by depleting their funds, or to reject what may be a just claim or plea for innocence so they can save face, and not payout a possibly just claim.

## **INCREASE LEGAL AID BY DOUBLE THE FUNDING**

Review and increase funding for legal aid to double the threshold for eligibility based on socio-economic trends of the disadvantaged, low wages, and casual employment.

## **LAW REFORM FOR MIDDLE INCOME AUSTRALIANS AND BUSINESS OWNERS**

Revue the Legal system and its impact on jobs and enterprises up to middle Australians on reasonable incomes who often also can't afford the fees even if they win as the fees balance the payment. They are often forced to represent themselves with limited success and unfairly convicted. Establish a mediation system to eliminate unreasonable practises.

### **Global Challenges Foundation New Shape Prize competition**

in 2017 Entered *Global Challenges Foundation Competition* for an alternate form of earth governance *with prize money 5 million.*

### **Task Force on Refugees- Julia Gillard**

My political and economic humanization report was accepted for consideration and assessed by the official panel.

### **My Future Earth Project (*Political and Economic Humanization*)**

I started this project after the one sidedness of and level of destruction of the Gulf War where the whole nation and its citizens were seen as the enemy with a month of raids by sleuth bombers with no resistance sickened me when the whole thing could have been sorted out with Sudam diplomatically. There were only 400 casualties to the Americans and 600 thousand Iraqi casualties and excessive destruction. I also wrote an epic peace song Across the Skies, which I have developed to over a dozen listed at the back as a possible music promotion.

I have developed this world management, political reform document over 25 years, based on principles of, a duty of care to the public and all earth citizens and definitions of corporate responsibility to the public and the nation and industrial relations and definition of the value of a human being and family in corporate law to control excessive downsizing offshore labour and manufacturing and in the national interest keep more people in jobs and off the streets. Included are 4 Bubble diagrams of United Nations Reform as a more regionalized UN structure and freehand sketch of a proposed New Regional Operational Headquarters Building. The new structure is based on negotiation of equitable and economic, humanitarian and peaceful models for each nation to negotiate towards taking exclusive power away from the leaders to exercise due process and not act on emotion without considering the impacts on others.
